## CONTENTS.

Report of the Accountant General of the Navy and Comptroller of Navy Pay, dated 13th March 1877	p. v
Total of Debits, of the several Manufacturing Accounts and Conversion of Timber, abstracted from the Expense Accounts, Parliamentary Return, No. 102, Session 1877	p. vi
General Abstract of the Cost of Conversion of Timber in Her Majesty's Dockyards, and of Manufactures in Her Majesty's Dockyards at Home, including the Engineers' Branch, together with the Excess of Cost over Value, and of Value over Cost, at which the Manufactures were returned to Stock, and a Comparison of the Aggregate Totals in Manufacturing Accounts, Parliamentary Return, No. 104, Session 1877, and Expense Accounts, Parliamentary Return, No. 102, Session 1877, for the Year 1875-76	pp. viii and ix
Abstracts showing the Value of Materials and Cost of Labour expended in the Conversion of Timber at the Saw Pits and Saw Mills, and in the Manufacturing and Repairing Articles on Conversion at the Workshops in Her Majesty's Dockyards including the Engineers' Branch, compared with the detailed Account of Conversions in the Expense Accounts, Parliamentary Return, No. 102, Session 1877, for the Year 1875-76	pp. xii to xviii
Abstract showing the Value of Materials and Cost of Labour expended in the Conversion of Timber at the Saw Pits and Saw Mills, and in the Manufacturing and Repairing Articles on Conversion at the Workshops in Her Majesty's Dockyards, including the Engineers' Branch, and the Net Cost of the Produce thereof, for the Year 1875-76	p. xx
Abstract of the Cost of Conversion of the several descriptions of Timber in Her Majesty's Dockyards at Home, together with the Cost of the same, in Excess of, or Less than, Price at which charged to Storekeeper, for the Year 1875-76	pp. xxii and xxiii

### CONVERSION OF TIMBER.

Balance Sheets showing in detail the Cost of the Conversion of the several Descriptions of Timber at the Saw Pits and Saw Mills at the several Dockyards, for the Year 1875-76; also, the Net Cost of the same in Excess of, or Less than, Prices at which charged to Storekeeper, viz.:-

English Oak	pp. 2 to 13	Canada Elm	pp. 62 to 71
Italian Oak	14	Firs, Dantzic and Rigà	72 " 82
Dantzic Oak	15 to 18	" Pitch and Red Pine	83 " 92
Mahogany, of sorts	19 " 31	" Yellow Pine	93 " 104
Teak	32 " 36	Ash, of sorts	105 " 108
African	37	Beech	109 " 111
Greenheart	38 to 40	Deals, Spruce	112 " 120
Cedar	41 " 44	Deals, Deck	121
English Elm	45 " 56	Old Oak	122
Wych Elm	57 " 61	Old Firs, of sorts	123

### MANUFACTURES, DOCKYARDS.

Balance Sheets showing the Cost of Manufacturing and Repairing Articles on Conversion at the several Dockyards in the Year 1875-76, viz.:-

Roperies	pp. 126 to 145	Coopers' Shops	pp. 397 to 399
Rigging Houses	146 " 170	Millwrights' Shops	400 " 410
Sail Lofts	171 " 217	Locksmiths, Braziers, and Tinmen's Shops	411 " 418
Colour Lofts	218 " 245	Metal Mill	419 " 424
Smitheries	246 " 281	Block Mill	425 " 437
Steam Hammer Shops	282 " 285	Hosemakers' Shops	438 " 452
Capstan Houses	286 " 289	Plumbers' Shops	453 " 463
Mast Houses	290 " 306	Painters' Shops	464 " 474
Boat Houses	307 " 327	Coppersmiths' Shops	475 " 480
Blockmakers' Shops	328 " 333	Iron Foundry	481 and 482
Treenail and Coakmakers' Shop	334 and 335	Lead Mill	483
Oarmakers' Shops	336 to 342	Galvanizing Shops	484 to 490
Oakum and Pitch-heating Houses	343 " 348	Iron Shipbuilding Shop	491
Joiners' Shops	349 " 380	Tanning Shop	492 and 493
Turners' Shops	381 " 385	Torpedo Shop	494 " 495
Wheelwrights' Shops	386 " 396		

### MANUFACTURES, ENGINEERS' BRANCH.

Balance Sheets showing the Cost of Manufacturing and Repairing Articles on Conversion in the Engineers' Branch at the Dockyards in the Year 1875-76, viz.:-

Boiler Smitheries	pp. 498 to 507	Boiler Shops	pp. 553 to 566
Engine Smithery	508	Steam Hammer Shop	567
Iron Foundries	509 to 515	Pattern Shops	568 to 573
Brass Foundries	516 " 525	Paint Shop	574
Coppersmiths' Shops	526 " 532	Galvanizing Shop	575 and 576
Fitting Shops	533 " 552		

# NAVAL ACCOUNTS.

## DIVISION I.—NAVAL YARDS.

### PART II.—MANUFACTURES.

#### REPORT of the ACCOUNTANT GENERAL OF THE NAVY and COMPTROLLER OF NAVY PAY.

PARLIAMENTARY ACCOUNT, 1875-76.

(6612.)

Admiralty, S.W., 13 March 1877.

1. I BEG to forward herewith the Accounts for the year 1875-76 of the Cost of Conversion of Timber in Her Majesty's Dockyards, and Manufacture of Articles for Store in the Dockyard, including the Engineers' Branch, showing how far the Cost is in Excess of, or Less than, the Rate Book prices; in order that the same may be laid before Parliament, in accordance with the course pursued in respect to similar Accounts for previous years.

2. A Statement is subjoined explanatory of the nature and object of these Accounts, and of their connection with the Expense Accounts.

3. The aggregate Cost of the Produce is 757,504 *l.*, the value at which the same was charged to Stock, being 775,925 *l.* The net saving in Cost of manufacture as compared with the current Rate Book value of the same (at which so much of it as was not returned at Cost price was charged to Stock), being about 2·43 per cent.

4. A proportion of this difference is due to the article Iron re-manufactured at the Metal Mill at Chatham, the Cost of which, including the value of the Old Material, priced as nearly as may be at the rate at which it could have been sold, was 5,688 *l.* less than the price at which New Iron of similar description could have been purchased. Exclusive of this item, the net saving on the Cost of manufacture as compared with Rate Book price would be about 1·72 per cent.

5. A considerable proportion of the differences between Cost and Value, of which the remaining 1·72 per cent. consists, is due to the Cost of Repairing Articles for Store having been somewhat less than is allowed for in fixing the value at which repairable articles are to be charged to Stock when returned from Ship, and subsequently issued to the Shop for repair.

H. WALKER,  
Accountant General of the Navy and  
Comptroller of Navy Pay.

The Secretary of the Admiralty.

---

### EXPLANATORY MEMORANDUM.

---

1. THE Balance Sheets in this book are Sub-Accounts of the Expense Accounts (Parliamentary Return, No. 102, Sess. 1877), accounting, in detail, for the sums shown to the debit and credit of the several Conversion heads shown therein.

2. A reference to the several Conversion Accounts included in the Expense Accounts, showing the agreement (or, where necessary, explaining any small discrepancies) between the amounts accounted for in them and in these detailed Accounts, will be found at pages viii to xviii.

3. These Accounts are compiled from the Balance Sheets as rendered by the professional officers responsible for the conduct of the Manufacturing Shops at the Yards, and audited locally by the Accountants of the Yards.

4. The Balance Sheets, as rendered, are in much fuller detail than has been deemed necessary to reproduce for the information of Parliament, and account on the Dr. side, for all material drawn from store, and for all labour expended in manufacturing or repairing articles intended to be returned into store for subsequent issue to ships, or for other purposes.

5. On the Cr. side are shown the several articles so made or repaired, and returned to store, valued at the Rate Book price at which they will subsequently be issued, or at the actual Cost price, ascertained as nearly as practicable at the time, if there be no Rate Book price.

6. In contrast with these credits is shown against each article, or class of article, the actual Cost, as ascertained when the accounts are finally completed, balanced, and audited.

7. The cost, so ascertained, is the basis of the price inserted in the next annual revision of the Rate Book of the Yard (due allowance being made for subsequent or anticipated fluctuations of prices of material or labour), the Rate Book price being that at which all issues from store are made, and separate Rate Books being prepared for the several Yards.

8. The Balance Sheets, besides affording information calculated to be useful in assisting to determine the relative economy of buying articles in a manufactured state or of making them in the Yards, are largely instrumental in the economic administration of the Yards; and are subject to a close scrutiny in office, the prices at which articles of similar character are made at different Yards being compared, and, when necessary, sent to the Yards and made the subject of local inquiry, with a view to the Manufacturing Shops being conducted with the same regard to economy, and the same scrupulous attention to those minute details of management upon which the loss or gain of Manufacturing Establishments depends.

By Excess of Cost over Value at which Converted Produce at Mills has been returned to Stock - - - - -									*85 13 8	85 13 8	—	
TOTAL - - - £.									393 14 6	—	—	

Figures in *Italics* against the Converted Produce, represent the Rate Book Price or Value at which it was returned to Stock for subsequent Issue; the common figures represent the Cost Rate or Value, and the small common figures represent the Cost of Timber Materials not having a Rate Book Price, as nearly as could be ascertained at the time they were returned to Stock. Figures against the other Returns to Stock, both common and *Italics*, are the Rate Book Prices or Values at which these Returns were debited to Stock.

\*This Excess of Cost over the Rate Book Value was caused by defects discovered in the Logs, and by the extent of loss in the conversion of Rough Logs into Sided Timber.

For explanation on Figures in *Italics*, &c., see page 4.

\*The Officers report that "as there was not a sufficient store of this (3½ in.) plank to meet the requirements of the service, and the stock of 5 in. was large and of old date, it was thought desirable to reduce the latter, instead of demanding new plank," which will account for the Excess of Cost over Rate Book Value.

Figures in *Italics* against the Manufactured and Repaired Articles, represent the Rate Book Price or Value at which they were returned to Stock for subsequent Issue; the common figures represent the Cost Rate or Value, and the SMALL common figures represent the Cost of Articles not having a Rate Book Price, as nearly as could be ascertained at the time the Articles were returned. Figures against the other Returns to Stock, both common and *Italics*, are the Rate Book Prices or Values at which these Returns were debited to Stock.

NET Cost of Produce less than Price at which charged to Storekeeper - - - - £.									*30 6 3

For explanation on Figures in *Italics*, &c., see page 129.

\* The officers report that this difference of Cost less than Rate Book Value was caused by using Teak cuttings instead of Ofal, whereby the expense of sawyers' work in converting is reduced."

# ARMMAKERS' SHOPS.

ABSTRACT of the following detailed Debit and Credit Transactions at the OARMAKERS' SHOPS of the several undermentioned Dockyards  
in the Year 1875-76.

By other Returns to Stock, viz. :									
Surplus materials - - - -	-	-	58 7 3	- - -	- - -	- - -	-	58 7 3	- - -
TOTAL - - - -	-	-	571 6 7	452 18 10	91 16 9	- - -	-	1,056 2 2	171 14 4
								889 18 5	- - -
									5 10 7
By Excess of Cost over Value at which the above has been returned to Stock - - - - -								*166 3 9	166 3 9
TOTAL - - - £.								1,056 2 2	

For explanation on Figures in *Italics*, &c., see page 129.

\* This Excess of Cost over Rate Book Value was occasioned partly from the Oars returned to Stock under the previous Rate Book Price, which was lower than that of the present year; and partly from the reduction of Deals in Stock, thereby necessitating the use of more expensive materials.

NET Cost of Produce less than Price at which charged to Storekeeper - - - - £. *360 6 1									

For explanation on Figures in *Italics*, &c., see page 129.

This difference was incurred chiefly (to the amount of 292 7.) on Bolts and Nuts, Muntz's metal," and was occasioned by the large quantity made, and the employment of boys in their manufacture; the remainder was upon Repaired Work, the cost of which being less than the proportion allowed for this work.

NET COST of Produce less than Price at which charged to Storekeeper - - - £.									*11,331 16

\* Of this difference 4,251 £. is due to Iron Blooms, the low cost of which compared with the Rate Book Value is reported by the Officers as having been caused by a less consumption of coals than usual, and at a less cost per ton ; also by the old iron being in a better condition for working than ordinary, thereby occasioning a smaller amount of loss. Also 5,688 £. of this difference was on re-manufactured iron, and the Officers report that "the reason the cost of iron is less than Rate Book rate, is due to the fact of Rate Book prices being near the market value of the manufactured iron, and the cost of re-manufacturing iron at Metal Mills is considerably less."

For explanation on Figures in *Italics*, &c., see page 129.

### REPORT of the ACCOUNTANT GENERAL OF THE NAVY AND COMPTROLLER OF NAVY PAY.

(No. 709.)

Admiralty, S.W., 15 November 1877.

1. THESE Navy Victualling Accounts have been compiled, as heretofore, in the shape they will assume as a portion of one complete Account which, it is hoped, will be annually prepared of the details of Expenditure for the whole of the Naval Services.

2. They commence, pages 8 and 9, with a "General Statement" showing the total amounts granted and the total amounts expended for the Navy for Victualling Service under each Vote for each Yard, &c., as they appear in pages 22 and 23 of the published Retabulation of the Surpluses and Deficits upon the Navy Grants (Parliamentary Paper, No. 103, of 1877), and proceed with a "Balance Sheet" for the year, pages 12 and 13, showing in detail under the several Sub-heads of the Votes the amount expended and, so far as the Home Yards are concerned, the value of the Stock received, disposed of, and remaining.

3. At pages 15 to 35 are shown the several quantities and cost of every description of article brought to account during the year for the Victualling Service of the Navy, whether obtained by purchase from Contractors or Vendors, or supplied by other Departments of Government, the totals of these expenditures being duly carried to the Balance Sheet, page 12.

4. Pages 37 to 43 give Stock Valuation Accounts for the Home Victualling Yards, showing the money value of the aggregate transactions under each head of receipt and issue, together with the remains in stock at each yard; and the amounts shown under the heads of receipts from "Contractors" and from "Other Departments" (in which cases, only, an actual payment or cash transfer is made), agree with those in the details of purchases in the preceding pages 15 to 35.

5. A Statement, at pages 46 and 47, of the "Appropriation of the Victualling portion of Votes 7 and 11" shows the amounts which are distributed in the Balance Sheet, page 13, as "Indirect Charges," as well as those portions of the Salaries, Wages, &c., which are chargeable to Conversions.

6. The Conversion Accounts, of which Abstracts are given at pages 49 to 59, and details at pages 61 to 105, contain, in addition to the Cost of Manufacture under the several heads of Materials, Labour, Supervision, &c., an analysis of the production, for the sake of comparison of yard with yard, and are reproduced both in the Stock Valuation Accounts, pages 37 to 43, and in the Balance Sheet, pages 12 and 13.

7. Thus, the transactions of the Victualling Yards at Home, in the most minute particulars, are carried to the Balance Sheet, and thence through the Retabulation of the Surpluses and Deficits to the Appropriation Accounts. Similarly, the Victualling Yards Abroad as regards actual money expenditure, and the Ships Afloat as regards payments for Stores purchased, are connected with the Parliamentary Votes; and only the question of clerical labour intervenes in extending to them the full elaboration of the Stock which is herein applied to the Home Victualling Yards.

H. WALKER,  
Accountant General of the Navy, and  
Comptroller of Navy Pay.
